

Midwest Math Conference: Genuine vs Static Assessment K-5

Thursday, July 27, 2017
Hilton Lisle, Illinois

Sponsored By:

JUMP START your professional learning this summer by joining Cathy Fosnot and math educators from across the country for an exciting one-day workshop on authentic formative math assessment. Work together with Grades K-5 teachers, coaches and district leaders to explore, develop and implement authentic formative assessments to capture development of content understanding, aligned with the Common Core State Standards.

The common vision about assessment that we all share so

- Learn how to assess mathematical activity in an authentic context.
- Observe real-time assessment with children.
- Develop the ability to kidwatch and analyze children's work for the mathematics within.
- Explore the use of 2-pen assessments to capture the development of numeracy.
- Explore digital tools that you can use to capture learning in the moment.
- Leave with tools, measures, rubrics and carefully crafted items as well as the ability to design your own.

deeply is that it needs to inform teaching. Assessment should capture genuine mathematizing, not just answers, nor the verbal prose explaining them. We need to capture what a child can do and what is on her horizon, rather than only what she cannot do.

Join Cathy and others on **Thursday, July 27, 2017** for this exceptional professional learning opportunity on mathematics assessment for elementary-age students.

Cathy Fosnot is CEO and President of *New Perspectives on Learning*. An award-winning author, she speaks around the world on producing vibrant math communities in K-8 classrooms. She is the author of the book series *Young Mathematicians at Work* and the curriculum series *Contexts for Learning Mathematics* (Heinemann), and was the founding director of *Mathematics in the City* – a national center for professional development at The City College of New York.

CONFERENCE INFORMATION:

Date: Thursday, July 27, 2017

Time: 8:30 AM—3:30 PM

Place: Hilton Lisle, Illinois

Host: MathRack, Inc

Hotel Accommodations are available at:

Hilton Lisle, Illinois
(630) 505-0900

Further information is available at:

www.midwestmathconference.com

Email Us At:

info@midwestmathconference.com

Fee: \$195.00 per person* • Limited space available
Lunch will be provided • Fabulous Giveaways!

To register, please make the check out to:
Midwest Math Conference and send to Midwest Math
Conference, 1380 Langford Ct. Wheaton, IL 60189

Name: _____

Address: _____

E-mail address: _____

*Full refund will be given to any cancellations prior to June 28, 2017.

Please detach and send with payment.
